

Outreach Program

The Outreach Program at Step By Step Academy, Inc. is a newly-designed program created to assist families in need of behavioral services in the home and community. The Outreach Director works with the Social Work team to provide an array of resources and services to families outside of Step By Step Academy, Inc.'s center-based program. The goal of the Outreach program is to empower families with the knowledge they need to promote the maximum amount of growth and success for their child. Outreach offers support to staff and professionals involved in the consumer's case, including, but not limited to, developing comprehensive behavior plans and training.

Involvement with the Outreach Program includes:

- Creating comprehensive behavior plans for clients with severe problem behavior
- Training staff on data collection, implementation of consumer-specific programming, and the principles and procedures of Applied Behavior Analysis
- Monthly supervision meetings with Step By Step Academy, Inc.'s psychologist team to discuss case reviews
- Meeting weekly with a Licensed Social Worker to discuss case reviews and troubleshoot new or ongoing problems as reported by consumer families
- Assisting and linking families to various resources in their local area
